Visually and to the touch, it is almost impossible to tell that Gerbür Aqua-Click is not a real wooden floor due to it's incredibly realistic wood grain surface. This means you can have the the effect of natural stylish real wood with none of the disadvantages. Manufactured from 100% virgin PVC, meaning it is not only visually stunning, it is also extremely durable and 100% waterproof. Installed as a floating floor, Aqua-click simply clicks together very quickly and easily using the patented Uniclick locking system, and at only 4mm overall thickness it is a perfect floor for renovations or to place over any flat and level subfloor.

With Diamondshield™ scratch resistant surface Gerbür Aqua-click LVT flooring has been crafted to withstand the toughest environments from a child's nursery to a busy hotel foyer. No stiletto heel marks or indentations like real wood or unsightly. That sought after real wood floor look can be expensive to install and costly to maintain.

Gerbür Aqua-click offers superb natural effect, incredible durability and excellent value for money. Design and fuction, welcome to Gerbür.
